# Cyber Security Awareness

## Public Wi-Fi

- ❑ May not be trustworthy. They could share your information to other companies who operate in countries without any data protection.
- ❑ You may not know who is watching you whilst you're online.

## What to do and not do to

- ❑ Don't use online banking. Use your own data.
- ❑ Don't conduct any purchases
- ❑ Use a virtual private network (VPN)
